

Visitor works actively at Sauter

Metzingen, August 4th, 2022. A sweaty appointment in the afternoon, at our headquarter in Metzingen. Because it's about 40 degrees outside and the heat is also noticeable inside. On the other hand, because our rotary table systems and tool turrets are manufactured there. During his #Sommertour22, Michael Donth, a member of the Bundestag, was at work at several SAUTER workstations. He screwed, hammered and measured and was very impressed by the precision with which our heavy metal parts are machined and aligned.

As a Member of parliament for the constituency of Reutlingen, Michael Donth MdB (CDU) is usually busy with a wide range of federal tasks, constituency issues and citizens' concerns. As part of his #SommerTour22, which has the motto "Working when others go on vacation", he is on the road at 33 stations in his constituency and is helping out everywhere.

This is how Michael Donth also went to Sauter Feinmechanik to lend a hand not in the administrative departments, but in the production department. At various stations, he was able to get a good impression of the work in a mechanical engineering company.

Many thanks for the great support.

Michael Donth MdB (CDU) Reutlingen constituency
- member of the german parliament

Michael Donth working on the test stand for tool turrets
under the guidance of his colleague

He quickly gets the hang of it.

Michael Donth really enjoyed working at Sauter.
